

YaP MMO Guilds

Social progression guilds for the MMO stack — separate from **YaP Factions** (territory/claims). Guilds focus on levels, perks, bank, chat, and XP from skills/bosses.

Install

```
gradle :guilds-plugin:installIntoPlugins
# or full gameplay:
YAP_GAMEPLAY=1 gradle installGameplayDefaults
```

Requires `yap-db.jar` and shared YaPDB. Optional: `yap-playerdata.jar` (bank), `yap-skills.jar` (skill level-up XP), `yap-mmo-content.jar` (boss kill XP).

Commands

Player (`/g` or `/guild`)

Command	Description
<code>/g create <name> <tag></code>	Create guild
<code>/g disband</code>	Leader disbands
<code>/g join <guild></code>	Join (respects join mode)
<code>/g leave</code> / <code>/g kick <player></code>	Membership
<code>/g invite</code> / <code>/g accept\ deny</code>	Invite flow
<code>/g promote\ demote\ leader</code>	Roles
<code>/g desc</code> / <code>/g motd</code>	Description & MOTD
<code>/g open\ closed\ inviteonly</code>	Join mode
<code>/g home\ sethome\ delhome</code>	Guild hall home
<code>/g chat</code> / <code>/g oc</code> / <code>/g ac</code>	Guild, officer, ally chat
<code>/g ally\ enemy\ neutral</code>	Guild relations
<code>/g level</code> / <code>/g perks</code> / <code>/g contrib</code>	Progression info
<code>/g top [page]</code> / <code>/g members</code>	Leaderboards
<code>/g deposit\ withdraw\ bank</code>	Guild bank

Admin (`/yapguilds`)

Command	Description
<code>/yapguilds reload</code>	Reload config + service
<code>/yapguilds snapshot json</code>	Dashboard live snapshot
<code>/yapguilds setlevel <guild> <level> [xp]</code>	Set level/XP
<code>/yapguilds disband <guild></code>	Force disband

Guild XP & levels

- XP from: skill level-ups (online members), boss kills, periodic online tick
- Level unlocks: more member slots, higher bank cap (config `guild-xp.*`)
- Perks listed in config `perks.level-N` — shown via `/g perks`

Roles

LEADER → OFFICER → VETERAN → MEMBER → RECRUIT

API

Register `GuildService` on Bukkit ServicesManager. Soft lookup:

```
GuildServices.find().ifPresent(s -> s.addGuildXp(guildId, playerId, 100, "quest"));
```

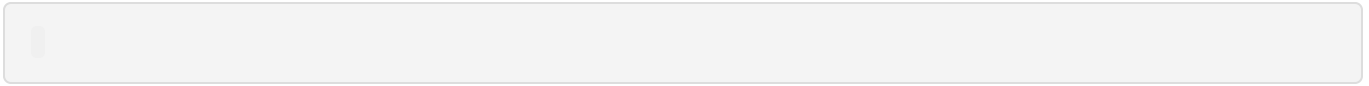

Placeholders (PlaceholderAPI)

Placeholder	Value
<code>%yapguild_name%</code>	Guild name
<code>%yapguild_tag%</code>	Tag
<code>%yapguild_level%</code>	Level
<code>%yapguild_xp%</code>	Current level XP
<code>%yapguild_bank%</code>	Bank balance
<code>%yapguild_max_members%</code>	Member cap
<code>%yapguild_bank_cap%</code>	Bank cap

Dashboard

GET /api/guilds — read-only JSON snapshot.

Smoke

vs Factions

Feature	Guilds	Factions
Territory/claims	No	Yes
Levels/perks	Yes	Power/shield
MMO XP hooks	Yes	Death power loss
Gameplay bucket	yap-guilds.jar	yap-factions.jar
