

Terms of Use

Effective date: 1 September 2026

Last updated: 1 September 2026

These Terms of Use ("**Terms**") govern your use of **YaPcore** software, documentation, and related materials provided by **YapLabs** and contributors ("**we**", "**us**").

By downloading, building, or running YaPcore, you agree to these Terms. If you do not agree, do not use the software.

Related documents:

- [Privacy Policy](#)
- [Licensing](#) (GPLv3 and third-party notices)
- [LICENSE](#) (full GPLv3 text)

Not legal advice. For commercial or large public networks, consult qualified counsel.

1. What YaPcore is

YaPcore is **self-hosted Minecraft server software** — a chassis (YapEngine), game jar (YaP-Folia), optional proxy (YaP Link), and first-party plugins. It is **not** a hosted game service operated by YapLabs.

You provide the hardware, network, backups, moderation, and player-facing rules.

2. License to the software

YaPcore first-party source and plugins are licensed under the **GNU General Public License v3.0 (or later)** unless a file states otherwise. See [LICENSING.md](#).

Under GPLv3 you may use, study, modify, and redistribute the software subject to GPLv3 obligations (including source offer when distributing binaries). These Terms **do not** replace or narrow GPLv3 rights granted to you.

Third-party components (Folia/Paper, Tebex, Grim, Faithful pack, MariaDB images, etc.) have **separate licenses**. You must comply with each when you ship or run a server.

3. Minecraft, Mojang, and trademarks

- **Minecraft** is a trademark of **Mojang Studios / Microsoft**.
- YaPcore is an **independent** project and is **not** endorsed by Mojang or Microsoft.
- Running a server requires accepting the **Minecraft EULA** and applicable [Minecraft Usage Guidelines](#).
- You must not imply official partnership with Mojang, Microsoft, or YapLabs without written permission.

Commercial servers, monetization, and cosmetics are subject to **Mojang's rules**, not only these Terms.

4. Acceptable use

You agree **not** to use YaPcore to:

1. Violate any applicable law or regulation
2. Infringe intellectual property or privacy rights of others
3. Distribute malware, cheat clients, or unauthorized copies of Minecraft
4. Harass, threaten, or exploit other users (when you operate a server for others)
5. Bypass Mojang authentication or licensing requirements
6. Misrepresent the origin of the software (e.g. proprietary forks without GPLv3 compliance)
7. Attack networks you do not own (DDoS, unauthorized scanning, credential stuffing)

Server operators are responsible for enforcing rules for their communities and for content created on their instances.

5. Operator responsibilities

If you make a YaPcore server available to other players, you are solely responsible for:

Area	Your obligation
Player terms & privacy	Publish your own Terms and Privacy Policy
Data protection	Lawful basis for processing player data (GDPR, COPPA, etc.)
Moderation & safety	Staff conduct, reporting, age-appropriate environments
Commerce	Tebex/store compliance with Mojang EULA and payment laws
Security	Patching, backups, access control, incident response

Area	Your obligation
Uptime & data loss	No guarantee from YapLabs — you operate the stack

YaPcore includes admin tools (web dashboard, moderation plugins, anticheat hooks). Misuse of those tools against players may violate law or platform rules — that is **your** liability, not YapLabs'.

6. Documentation and support

Documentation in `docs/` is provided **as-is** for operators. It may become outdated as features ship. Community support may be available via GitHub issues; there is **no** guaranteed SLA unless you have a separate written agreement with YapLabs.

7. Disclaimers

THE SOFTWARE AND DOCUMENTATION ARE PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT.

YaPcore is game server software. We do **not** warrant:

- Uninterrupted or error-free operation
- Compatibility with every client mod, plugin, or hosting environment
- Protection against all security incidents or griefing
- Specific gameplay outcomes, economy balance, or MMO progression

You assume all risk for production use, public exposure, and player data.

8. Limitation of liability

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, YapLabs, contributors, and copyright holders shall **not** be liable for any indirect, incidental, special, consequential, or punitive damages, or any loss of profits, data, goodwill, or business interruption, arising from:

- Use or inability to use YaPcore
- Player conduct on servers you operate
- Third-party plugins, hosts, or integrations you enable

- Unauthorized access to your dashboard, database, or world files

Some jurisdictions do not allow certain limitations; in those cases, liability is limited to the greatest extent permitted by law.

9. Indemnification

If you operate a server for others or redistribute modified builds, you agree to **indemnify and hold harmless** YapLabs and contributors from claims arising from **your** operation, your players' conduct, or your violation of these Terms, Mojang policies, or applicable law — except where caused by our intentional misconduct (which does not apply to typical self-hosted GPLv3 software distribution).

10. Updates and termination

We may update YaPcore and these Terms. Check the **Last updated** date. Continued use after changes constitutes acceptance of revised Terms for **software and docs**.

You may stop using YaPcore at any time. GPLv3 continues to govern copies you already received under that license.

11. Governing law

These Terms are intended for a global open-source project. Interpretation and disputes shall be governed by the laws applicable in **your jurisdiction** as the user or operator, without regard to conflict-of-law rules, except where GPLv3 mandates otherwise for software distribution.

12. Severability

If any provision is held invalid, the remaining provisions remain in effect.

13. Contact

- **Questions about these Terms:** GitHub issue in the YaPcore repository
- **Privacy:** [Privacy Policy](#)
- **License compliance:** [LICENSING.md](#)

14. Template for public server operators

You may adapt the following for your server (replace bracketed text):

Terms of Use — [Your Server Name]

By joining our Minecraft server you agree to follow our rules and this policy. We may ban or remove players who cheat, harass others, or break the [Minecraft EULA](#).

Donations and store purchases are [non-refundable / subject to ...]. We are not affiliated with Mojang or Microsoft. The server runs on YaPcore open-source software operated by [Your Name/Org].

This template is **not** legal advice.
