

YaP MMO Mechanics (yap-mechanics.jar)

World interaction layer for the MMO framework: **tools, stamina, resource nodes, farming, fishing physics, fall/projectile tuning.**

Systems

System	Config	Behaviour
Tool requirements	tools.yml	Block → required tool type + min tier (wood/stone/iron/diamond)
Stamina	config.yml	Break/fish/sprint drain; regen over time; blocks actions at 0
Resource nodes	nodes.yml	Fixed coords deplete → respawn on timer
Farming	farming.yml	Right-click mature crop to harvest; plant seeds on farmland
Fishing spots	nodes.yml	fishing-bonus multiplier near tagged coords
Physics	physics.yml	Fall/projectile damage multipliers; soft-landing blocks

API

MechanicsService on Bukkit ServicesManager (yap-mechanics-api):

- canBreak / breakDeniedReason
- stamina / consumeStamina / regenStamina
- fishingXpMultiplier
- fallDamageMultiplier / projectileDamageMultiplier

Other plugins (skills, combat, content) can query via MechanicsServices.find() .

Commands

Command	Permission
/ymechanics reload	yapmechanics.admin
/ymechanics stamina [player]	self / yapmechanics.stamina.others

Integration order

Load **before or with** yap-skills — both listen on BlockBreakEvent at HIGH (tools/stamina) then skills grant XP at MONITOR.

Content scale (recipes)

Regenerate expanded recipe packs (150+):

```
python3 scripts/content/generate-mmo-baseline-pack.py  
./gradle installGameplayDefaults
```

Recipe files under `plugins/YaPCrafting/recipes/` :

- `smithing.yml`, `smithing_extended.yml`
- `cooking.yml`, `cooking_extended.yml`
- `crafting.yml`, `crafting_extended.yml`
- `herblore.yml`
