

YaP MMO Skills (M1+)

Thirteen RuneScape-style progression skills ship in `yap-skills.jar` (YaPSkills), config-driven via `plugins/YaPSkills/skills/*.yaml`.

Full skill list (combat styles, prayers, spells): [MMO_RS_SKILLS.md](#)

Skill list (progression)

Skill	Config file	Primary XP source
Mining	<code>mining.yaml</code>	Breaking ores/stone
Woodcutting	<code>woodcutting.yaml</code>	Breaking logs
Fishing	<code>fishing.yaml</code>	<code>PlayerFishEvent</code>
Cooking	<code>cooking.yaml</code>	Furnace extract
Smithing	<code>smithing.yaml</code>	Furnace smelt + crafting stations
Crafting	<code>crafting.yaml</code>	Recipe crafts (<code>yap-crafting</code>)
Attack	<code>attack.yaml</code>	Melee damage dealt
Strength	<code>strength.yaml</code>	Melee damage dealt
Defence	<code>defence.yaml</code>	Damage taken
Hitpoints	<code>hitpoints.yaml</code>	Combat XP ratio
Ranged	<code>ranged.yaml</code>	Ranged damage dealt
Magic	<code>magic.yaml</code>	Magic damage / spell casts
Prayer	<code>prayer.yaml</code>	Prayer drain

Custom combat XP flows through `yap-combat.jar` when loaded (M2+). See [MMO_COMBAT.md](#).

Combat level (display)

Configured in `plugins/YaPSkills/config.yaml` — see [MMO_RS_SKILLS.md](#) for the RS-style formula.

Placeholders: `%yapskill_combat_level%`, `%yapskill_<skill>_level%`, `%yapskill_total_level%`

Commands

Command	Permission	Description
<code>/skills [player]</code>	<code>yapskills.use</code> / <code>yapskills.others</code>	Chest GUI with all skills + combat level
<code>/skill top <skill> [page]</code>	<i>(none)</i>	Async DB leaderboard (10 per page)
<code>/skill addxp <player> <skill> <amount></code>	<code>yapskills.admin</code>	Grant XP
<code>/skill set <player> <skill> <level></code>	<code>yapskills.admin</code>	Set level (<code>setlevel</code> alias)
<code>/yskills reload</code>	<code>yapskills.admin</code>	Reload config + skill packs

Skill GUI icons use dedicated `CLAY_BALL` + `CustomModelData` tokens (`icon` / `icon-cmd` in each skill YAML) so the menu does not borrow swords, pickaxes, or other gameplay items. Regenerate textures with `python3 scripts/generate-mmo-icons.py` (see [MMO_ABILITIES.md](#)).

Bedrock players: `/skills` opens a FormService panel when `yap-mmo-bedrock.jar` is loaded — [MMO_BEDROCK_UI.md](#).

Level gates

Each action in a skill YAML may set `min-level`. Blocked actions show a chat message citing the required level.

Dashboard

`GET /api/mmo` — read-only snapshot when skills plugin is loaded (M1+).
